The fastest growing all makes program in the Heavy Duty Aftermarket

Our goal is to identify, develop and introduce commonly replaced “Dealer-only” products to the heavy vehicle aftermarket; providing you with an alternative source to the OE Dealer.

We work hard to identify parts with common OE failure patterns and develop solutions offering better designs, improved materials and greater reliability.

Our development team stays dynamically engaged in the marketplace by using Dorman’s Field Analysts to constantly solicit feedback from heavy vehicle experts. Dorman HD uses this feedback to continuously improve products and develop new ideas to greater expand the size of the heavy vehicle aftermarket.
