THE MESS,  
THERE'S A BRAVO<sup>®</sup>  
FOR THAT.**

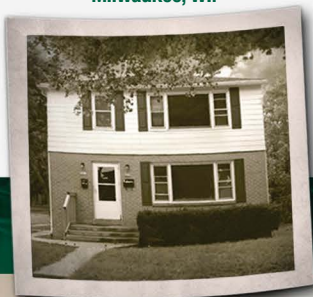

## There has never been a better time to be a Sellars distributor or customer.

Our expanding selection offers unique and economical solutions in a variety of markets. Our Bravo® family of paper towels brings ideally balanced performance into offices, lunchrooms, kitchens and coffee areas. Our Mayfair® Towel & Tissue provides quality, selection and fast fulfillment. Our TOOLBOX® wipers, shop towels, wet wipes and soaps continue to offer innovative clean up in a variety of grades and put ups. And our absorbent and sorbent offerings are second to none. Now more than ever, Sellars is your 'one-stop' solution for clean-up.

So if you're a Sellars distributor or customer, it just might be a great time to be you.

Company is founded in 1985 by John Sellars out of his basement and garage in Milwaukee, WI.

## MORE COMFORT, MORE CONVENIENCE & MORE THAN DOUBLE THE PRODUCTS THAN EVER BEFORE

With our expanded manufacturing and cutting edge technologies, we've created our best possible balance of comfort, quality and economy. Most of our new towel & tissue products are green with 100% recycled fibers. We now operate concurrent towel & tissue lines to ensure adequate inventory and fast dependable fulfillment. Our state of the art high speed and automated equipment enables us to produce a consistently high quality product at a consistently economical price point. And it's made right here in the USA.

**Some things go hand-in-hand, like Mayfair® Towel & Tissue with Mayfair dispensers.**

Our Mayfair dispensers are the perfect compliment to our Mayfair towel and tissue products. They feature a durable, impact-resistant design with dependable, efficient performance you can rely on. Our Mayfair line offers a variety of manual and automated dispensers to choose from. Installation is easy, and keys are included.

## TERMINOLOGY

### 1-Ply:

Single layer of paper

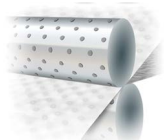

### 2-Ply:

Two layers of paper. 2-Ply typically has better absorbency- both speed and capacity. The two layers of paper are joined together using the following methods:

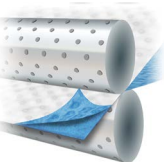

### Emboss:

Paper passes through 1 or 2 patterned rollers in the converting process. The rollers cut and shorten cellulose fibers, causing greater flexibility. Embossing serves to decorate, create desirable bulk/thickness, improve absorbency or ply bond. **PRO'S:** Improves Absorbency- Both Speed and Capacity Enhances Softness by Causing Greater Flexibility Increases Thickness. **CON'S:** Reduces the strength of the sheet.

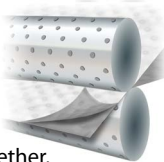

### Lamination:

Two or more plies of paper are joined together with an adhesive. This is a higher quality method but is more expensive. Most paper towels are produced using this method as well as "at-home" bath tissue.

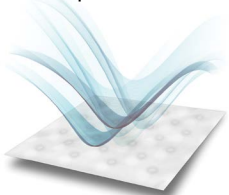

### Ply Bond:

Two or more plies of paper are joined together by being pressed together. This is a more economical method and typically used in most "away-from-home" towel & tissue products.

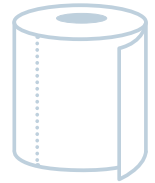

### TAD:

TAD is an acronym for "Through Air Drying" and is a technology that creates a softer and more absorbent towel compared to standard towel grade paper. It is made with 100% virgin fibers and is more of a premium product.

## TOWEL & TISSUE PUT-UPS:

	<p><b>Standard Bath Tissue</b> Sometimes referred to as "small roll", standard bath tissue is a perforated bathroom tissue that is wound into a "small roll" with or without a core and sold in both "at-home" and "away-from-home" markets.</p>	<p><b>Advantages/Benefits:</b> Softness Absorbency Break-Up- Shorter Fibers Sheet Width Sheet Count Selections Universal-Fits Most Dispensers</p>
	<p><b>Jumbo Roll Bath Tissue</b> Non-perforated bathroom tissue that is wound tightly and in significantly greater lengths than standard bathroom tissue creating a "jumbo" sized roll. This large format is sold in "away-from-home" markets.</p>	<p><b>Advantages/Benefits:</b> Maintenance Savings Storage Savings Less Product Run-Out Reduces Theft</p>
	<p><b>Hard Wound Roll Towels</b> Sometimes referred to as non-perforated roll towel. The roll is wound tight and is, therefore, "hard" when it is squeezed.</p>	<p><b>Advantages/Benefits:</b> Maintenance Savings Storage Savings Lower Cost Per Hand Dry Cleaner Washrooms Less Product Run-Out Cross Contamination Prevention</p>
	<p><b>Center-Pull Towels</b> Paper is typically wound on a perforated core which is pulled out before being placed into the dispenser where the towels are then dispensed from the center of the roll.</p>	<p><b>Advantages/Benefits:</b> Low Cost Dispenser- No Moving Parts Maintenance Savings Universal Dispensing- No Proprietary Dispensers Quiet Service- Dispense Towels with Limited/No Noise Less Product Run-Out Cross Contamination Prevention Storage Savings</p>
	<p><b>Multi-Fold Towels</b> Multi-Fold towels are folded in a "Z" pattern, also known as interfold.</p>	<p><b>Advantages/Benefits:</b> Best Value vs C-Fold &amp; Single-Fold towels Lowest Cost Dispenser- No Moving Parts "Z" or interfolded towels</p>
	<p><b>Single-Fold Towels</b> Single-Fold towels get their name from the "single" style of fold (note: some single-fold towels can have a second fold)</p>	<p><b>Advantages/Benefits:</b> Typically a 1-Ply Natural Towel which is economical</p>
	<p><b>C-Fold Towels</b> C-Fold towels get their name from "c" style of the fold</p>	<p><b>Advantages/Benefits:</b> Typically a 2-Ply Embossed Towel which has better absorbency and strength</p>

The problem is that unfiltered hand dryers can accumulate substantial germs and bacteria on the underside of the dryer. So next time you go to use a hand dryer, you might want to bend down and take a look.

Do you know about the dirt on hand dryers?

Hand dryers sound like a great deal unless you're standing near one...

What good is it to create a paperless hand drying solution that leads people to bypass drying their hands in order to avoid the sound? It's one of the reasons so many users stay away from hand dryers and prefer paper towels.

## Why Choose Sellars Mayfair® Foam Soaps and Sanitizers?

Sellars Mayfair® Foam Soaps and Sanitizers are a hand washing system for all your high traffic areas. Foam soaps are designed for cleansing and killing germs on hands. The best way to clean your hands is with soap and water, especially if they are visibly dirty. Antibacterial foam soap contains broad-spectrum antimicrobial ingredients with activity against many bacteria, and are designed to kill bacteria on skin to help prevent the risk or spread of illness.

If soap and water are not available the next best thing is hand sanitizers. Hand sanitizers are not designed to clean hands, but to kill germs. They are convenient and fast acting antiseptics that inhibit the growth and spread of bacteria. Since it is used without water, hand sanitizers are an acceptable alternative and can be used to supplement a hand washing routine.

Both Mayfair® soaps and sanitizers complement each other and are important products for an effective hand hygiene system for your facility. Keeping hands clean is one of the most important steps we can take to avoid getting sick and spreading germs.

# Wiper Selection Tools

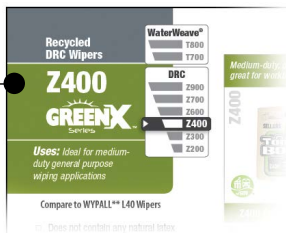

We understand that selecting the right wiper for your needs can seem like a daunting task but don't worry because we have developed a number of tools to help you including our state-of-the-art online **PowerMatch®** Competitive Cross Reference Tool.

We have also included tools in this catalog such as the wiper selection guide (below), a usage guide (next page), detailed cross reference guides (page 93-96), as well as comprehensive product information throughout the catalog.

## Using our product pages

Each product chart has basic product packaging and shipping information to help you more fully evaluate that product.

*In the upper left corner of each product category heading, there is a convenient product and usage overview to help you quickly find the product you need.*

## Terminology

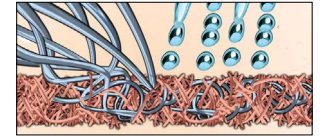

### Wiper

A material used to wipe your hands, face, equipment or other surfaces

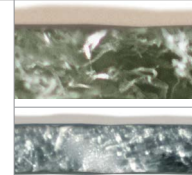

### WaterWeave®

A disposable wiper that is made using high pressure water jets that entangle pulp and polypropylene together to create an extremely tough wiper that is solvent resistant

### DRC (Double Re-Crepe)

A cellulose based disposable wiper that has a binder infused in it to provide incredible wet strength and durability while maintaining great absorbency and unmatched softness on your hands and face

**Sellars DRC Wipers**  
Latex resin infusion for incredible wet strength

**Ordinary Paper Towel**  
Wet Strength Additive

### SCRIM

A cellulose based disposable wiper that typically has between 1 to 2 layers of tissue on either side of it to provide good absorbency and a nylon "scrim" netting in the middle of it to provide superior wet strength

### RECLAIMED RAGS

A textile based wiper (Made from used clothing material that is typically donated to Not-For-Profit or charity organizations) that is extremely versatile and durable at an economical price

### NEW RAGS

A textile based wiper that typically comes from leftover material in a textile mill. The material is extremely versatile and it's never been used so it's higher quality but more expensive than Reclaimed Rags.

**Sellars Wiper Put Ups**

**Put Up Applications**

**In Action**

**Big Grip® Bucket**  
Our patented Big Grip® Bucket is a water resistant container that has a flip up center opening for access to our DRC wipers. Large handle makes it extremely portable and easy to use with included wall mount bracket.

Perfect for jobs outside, wet work sites or storing in the back of a pick-up or utility truck as it is designed to keep your towels clean and dry until they are needed

**Big Grip® Refill**  
Our patented Big Grip® Refill dispenser is the perfect hybrid wiper put up. Towels are packaged in a durable water resistant poly wrap with a peel and reseal label to cover the center opening.

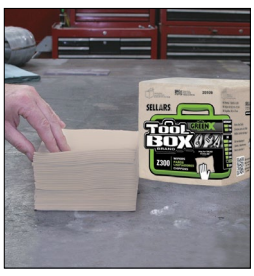

Can either be used as a refill for the Big Grip® Bucket or a standard wall mount dispenser OR it can be used as a stand alone center pull dispenser

**1/4 Fold Wipers**  
Our 1/4 Fold wipers are stacked on top of the other in a poly wrapper and are ideal for stationary jobs as they can be stacked out on a workbench or counter top allowing for quick and easy access to wipers.

Can be stacked out on a workbench or counter top allowing for quick and easy access to wipers. Recommended for areas with limited space and/or workers and moderate levels of contact with grease, grime, etc.

**Interfold Wipers**  
Our interfold wipers are packaged in a cardboard dispenser box that protects the towels and allows for single sheet dispensing and have the largest sheet size of any of our standard put ups.

Recommended for jobs that require portability and have moderate to high levels of contact with grease, grime, etc.

**Jumbo Roll Wipers**  
Our jumbo roll wipers are the most efficient wiper put up in our line as they have the largest number of sheets per unit allowing for less time spent replacing new wipers compared to our other put ups.

Recommended for jobs that have a large concentration of employees in one area and have high levels of contact with grease, grime, etc.  
*We have two different types of dispensers for these rolls: Floor Stand and Wall Mount.*

**Paper Towels**  
Our paper towels have been designed for maximum portability and simple dispensing. They can easily be carried to and from a specific area that requires a towel, left in an area with limited space that requires regular access to towels or can be used on a simple wall mount kitchen towel dispenser.

Recommended for areas with limited space and/or workers and has a low to moderate level of contact with grease, grime, etc.

# Sellars DRC Wipers

## Sellars DRC Wipers

**We put more into our TOOLBOX so you get more out of it.**

### Works like cloth and soft with incredible scrub strength!

*Sellars' DRC wipers are cellulose based disposable wipers that have a binder infused in it to provide incredible wet strength and durability while maintaining great absorbency, wipe-dry and unmatched softness on your hands and face.*

### Green Manufacturing that meets or beats virgin performance without increased prices!

*Sellars DRC wipers are made with a proprietary manufacturing process to yield cost-effective, recycled premium wipers that meet or SURPASS the standards of virgin products.*

### A wider, better selection

*Sellars wipers are available in a wider variety of strengths, styles and put-ups. Each of these soft, absorbent DRC Wipers works like cloth and is targeted at a unique market segment in order to offer a wiper for any need.*

### Green that grows business

*Several Sellars Wiping Products meet EPA Comprehensive Procurement Guidelines and provide opportunities to earn credits in several LEED-EB (Existing Buildings) Operation & Maintenance categories.*

## Sellars DRC Wipers Vs. Ordinary Paper Towels

*DRC wipers have larger absorption pockets than regular paper thus allowing not only for greater absorption but also more softness*

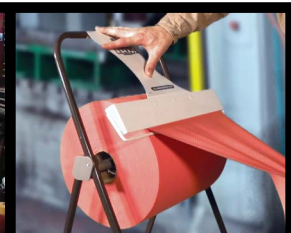

*DRC enhances each key wiper product criteria vs. ordinary paper:*

- Wet Strength (2x+)
- (60% of dry strength)
- Softness (2x)
- Absorbency (2x)
- Bulk (2.5x)

**Sellars DRC Wipers**  
Latex resin infusion for incredible wet strength

**Ordinary Paper Towel**

## A Wiper Dispenser You Can Carry AND Mount!

Our redesigned bucket and refill with mounting bracket offer users a whole new level of convenience in the home, shop or garage. The bucket that can be easily carried for remote use and can also be placed into the wall mount for both local usage and storage. This decreases the product's footprint and eliminates the long term need to take up valuable table space.

**We've added a complimentary Wall Mount Bracket!**

You can carry the bucket away and use it anywhere you need it. You can return the bucket to the mount anytime. It's completely portable.

**Screws Included**

Big Grip® buckets arrive with 3 screws for wall mount bracket included inside every bucket (packaged together inside small plastic bag).

**Water-Resistant Dispenser**

The durable plastic water-resistant bucket will stand up to much more punishment than boxes that fall apart.

**2-in-1 Dispenser**

The sturdy new grooved Big Grip® handle allows for fast and secure mounting and convenient carry along usage.

**Rags Worth Protecting**

Consumers who work with their hands for a living want rags that are clean, dry and close by. Try taking a cardboard box to a tough and messy job site and see how clean and dry your rags are.

**Big Grip Refills mean big savings!**

Perhaps best of all, the bucket is refillable. Our Big Grip® Bucket refill slides easily into the container so that you can reuse your bucket again and again. The economical refill costs less than the original bucket so you save money every time you refill your bucket. The more times you refill it, the more you save!

## On The Go And On The Wall With No Extra Cost!

Simply mount the bracket to your wall. Then flip the bucket and drop it into place. The durable mount holds the bucket in place allowing you to dispense freely from the bottom. If you want to remove the bucket and use it elsewhere, simply lift it out of the bracket and flip it. Now you dispense from the top. You can carry the bucket away and use it anywhere you need it. You can return the bucket to the mount anytime. It's completely portable.

# Laundered Rental Rags Vs. Disposable Shop Towels

**How clean are they when you receive them?**

**Laundered Rental Rags:** Metal shavings, oils and hazardous chemicals can be present on 'clean' laundered rental shop towels presenting both possible hazards to health and the possibility of machinery getting snagged.

**Disposable Shop Rags:** Clean out of the box every time, can be used multiple times before discarding, easy to dispose of.

**Are there any hidden charges?**

**Laundered Rental Rags:** As many as 6 additional charges: damage fee, energy charge, delivery charge, replacement fee, environmental/fuel surcharge fee.

**Disposable Shop Rags:** No hidden cost with disposable shop towels.

**How absorbent are they?**

**Laundered Rental Rags:** The absorbency, strength, and size of the laundered shop towel can diminish the more it is laundered.

**Disposable Shop Rags:** Shop towels can absorb up to 400% more than one standard 13"x13" laundered shop towel.

**What are the standard sizes?**

**Laundered Rental Rags:** The standard 13"x13" size of the shop towel can diminish to 12"x12" the more it is laundered.

**Disposable Shop Rags:** Shop towels are available in a wide variety of sizes and dispensing options depending upon your needs.

# Solvent Resistant WATER WEAVE Series®

## Stronger than Strong

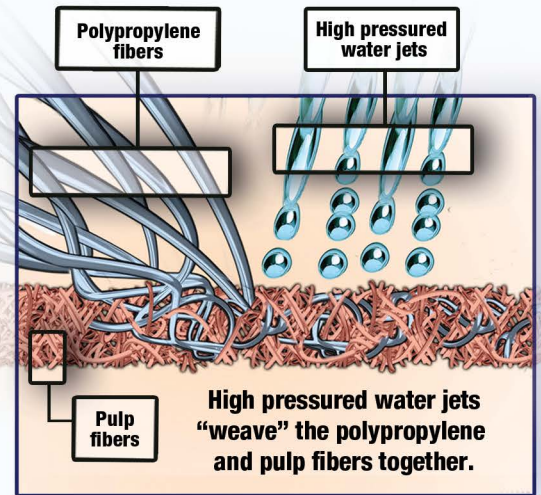

**Compare to WYPALL\* X70 & X80 wipers!  
Strong Enough for Your Toughest Jobs!**

Sellars Solvent Resistant WaterWeave® is not only the latest addition to our growing TOOLBOX® family of Wipers, it's the strongest. WaterWeave® is strong enough to take on your toughest jobs. These wipers can be used both wet and dry. And not only are they extremely strong, they're low lint and latex free. Compare WaterWeave® to WYPALL\* X70 & X80 wipers.

### Take on Tough Solvents

These wipers come in two grades, T700 & T800, and both are ideal for heavy duty jobs that include solvents like Isopropyl Alcohol, Denatured Alcohol, MEK (Methyl Ethyl Ketone), Acetone, Toluene, Xylene and Mineral Spirits.

### WaterWeave® : How It Works

#### WaterWeave®

- ✓ heavy-duty wiping
- ✓ tougher
- ✓ solvent resistance
- ✓ lower lint

#### DRC

- ✓ general purpose wiping
- ✓ softer
- ✓ more absorbent
- ✓ more economical

## Disposable Shop Towels vs. Laundered Rental Rags

### Guess what's on your 'clean' rental rag?

Gradient Corporation studies have found contaminants on supposedly clean laundered rental rags that include **lead, toluene, xylene, zinc and other heavy metals known to cause cancer or kill aquatic life.**

Residual oils and chemicals can also be present that can cause skin rashes. Residual metal shavings can be present that can injure faces and hands. A big part of the problem is that rental rags used with hazardous chemicals and waiting to be laundered are supposed to be separated into their own bags away from other used rental rags. This does not always happen and the result is that all of the rags are washed together and exposed to rags used for hazardous chemicals.

### WaterWeave® Wipers vs. Laundered Rental Rags

Rental rags can have residual oils and chemicals that can reduce absorption and cause streaks and smears. Loose thread and lint can get caught in machinery and snag. Silicone residue can inhibit adhesion of parts and interfere with electrical connections.

On the other hand, **Sellars Solvent Resistant WaterWeave® Wipers** can last thru several days of heavy use, have low lint and are more absorbent than rental rags.

### Oral Exposure to Metals in Shop Towels Via Hand Contact

Metal on Laundered Shop Towel

Metal on Hand

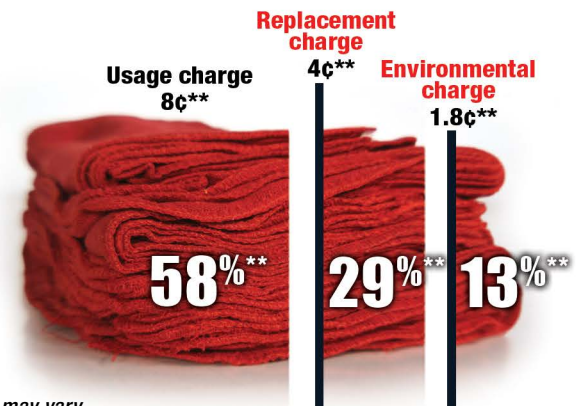

Metal Ingested

### Determining the real costs of rental rags

So you're paying a set usage fee per towel? It doesn't usually end there. You can also have **environmental charges and replacement charges.**

#### Reclaimed Fleece white wiping cloths

- Contains recycled material from white sweatshirts, sweatpants or similar fleece apparel
- Being white, they're great for avoiding any bleeding from the color in the wiping cloth
- Economical for uses with staining, painting, grease, oil, dirt, cement and grime
- Often preferred for heavy duty and general shop applications including larger jobs
- Sweatshirt rags tend to have a smooth jersey texture on one side with a fluffier 'downy' style texture on the reverse; material is soft

# Sellers Spill Control Selection Tools

We understand that selecting the right sorbent for your needs can seem way too complicated but don't worry because we have developed a number of tools to help you including our state-of-the-art online **PowerMatch®** Competitive Cross Reference Tool.

We have also included tools in this catalog such as the sorbent selection guide (below), a sorbent usage guide (page 44) and detailed cross reference guides (pages 81-92) as well as comprehensive product information throughout the catalog.

## Using Our Product Pages

Each product chart has basic product packaging and shipping information, absorbency data and incinerator information to help you more fully evaluate that product.

*In the upper left corner of each product category heading, there is a convenient product and usage overview to help you quickly find the product you need.*

## Our Sorbent Family

Our general purpose recycled cellulose and oil only cotton sorbents are made with a combination meltblown-spunbond coverstock as well as a version without coverstock at all.

Our original general purpose recycled cellulose and oil only cotton sorbents are made with a spunbond coverstock.

## Meltblown

Our universal, oil only and HAZMAT sorbents are made with 100% polypropylene.

## The Code of Federal Regulations(CFR)

The Code of Federal Regulations (CFR) is the codification of the general and permanent rules published in the Federal Register by the departments and agencies of the Federal Government. It is updated annually and it is divided into 50 titles that represent broad areas subject to Federal regulation. There are 4 titles that TOOLBOX® spill control products help you comply (see page 45 for details):

29 CFR- OSHA  
(Occupational Health & Safety)

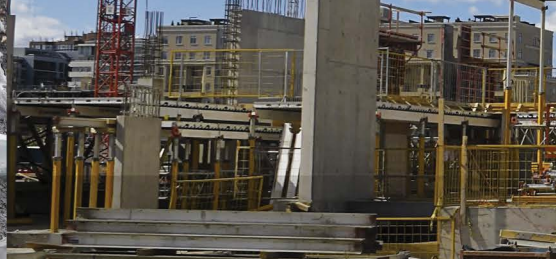

33 CFR- USCG  
(United States Coast Guard)

40 CFR- EPA  
(Environmental Protection Agency)

49 CFR- DOT  
(Department of Transportation)

# Terminology

**Sorbent**  
A material used to soak up leaks, drips or spills.

**Universal**  
A sorbent material, usually gray in color, which is designed to soak up oil, water and most chemicals. Typically, these are meltblown sorbents which are used indoors in many different MRO applications.

**General Purpose**  
A sorbent material, usually gray in color, which is designed to soak up oil and water but not aggressive acids or caustics. Typically, these are cellulose based sorbents which are used indoors in many different MRO applications.

**Hazmat**  
A sorbent material which is designed to soak up many different types of hazardous chemicals. They are usually yellow in color to denote the hazardous liquids they can soak up and make sure they are disposed of properly. Typically used in specialty applications such as soaking up battery acid.

**Oil Only**  
A sorbent material, usually white in color, which is designed to soak up oil but not water. Typically used in outdoor environments such as spills on open water.

**Coverstock**  
Typically a nonwoven fiber that is added to the outer layers of a sorbent to help increase the durability and strength of the product.

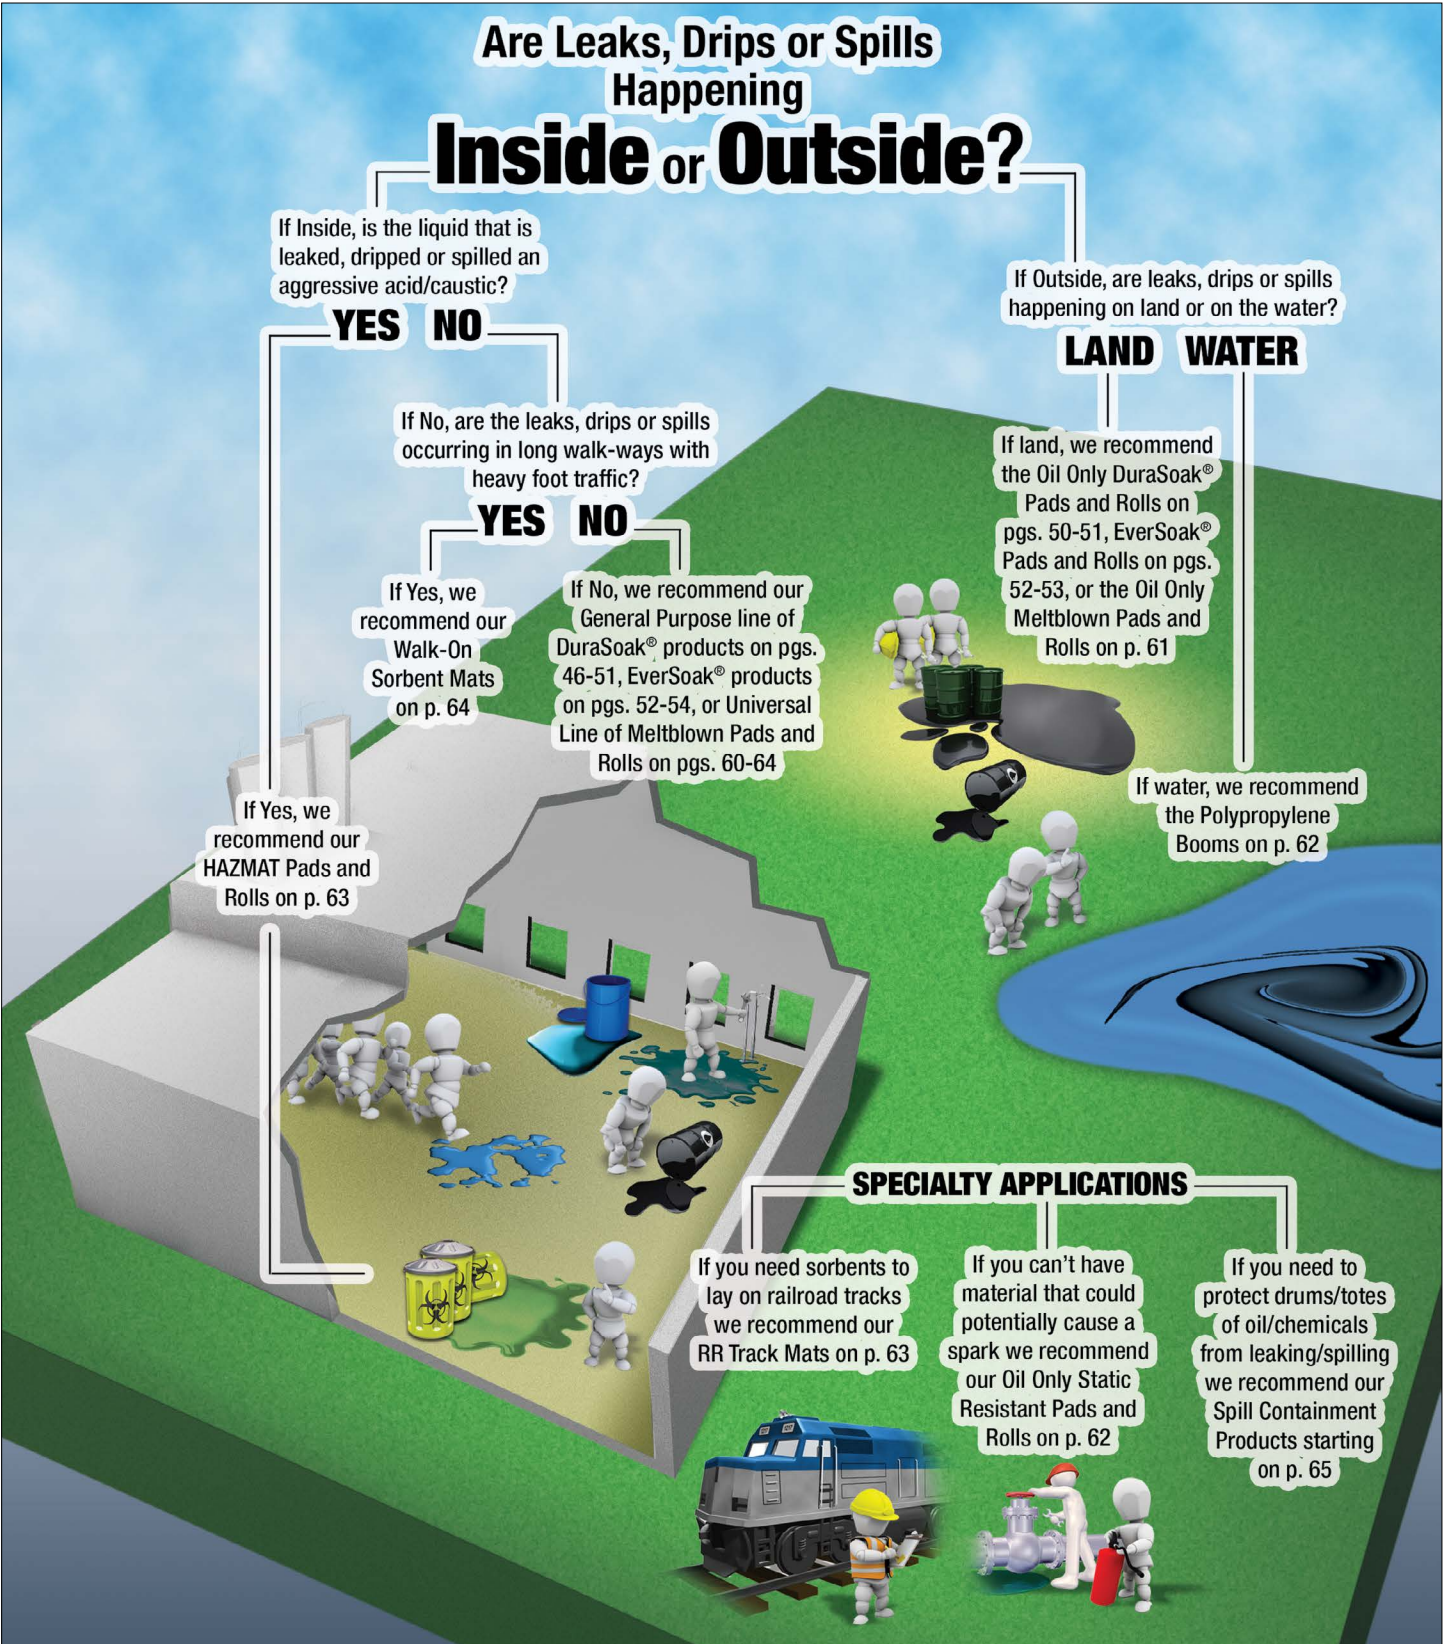

## Did You Know?

The word **Sorbent** is used instead of **Absorbents** because meltblown polypropylene actually adsorbs.

# Sorbent Usage Guide

The key to cleaning up any spill is picking the right tool for the job. Below are some common spill control situations and the best solutions for those spills. Simply answer yes or no to questions in descending order till you find the Sellars Sorbent that fits.

## Looking for Products that Help You Comply with the Code of Federal Regulations?

### 29 CFR – OSHA (Occupational Health & Safety Administration)

EverSoak® and Durasoak® Sorbent Pads & Rolls (see pages 46-54), OverPacks & Spill Kits help you comply (see pages 55-59 and 69-70)

29 CFR 1910.22(a)(2)

Summary: Floors in your workplace should be "maintained in a clean and, so far as possible, a dry condition."

29 CFR 1910.107(b)(3)

Summary: Combustible floors in a spray booth or work area "shall be covered with noncombustible material to facilitate the safe cleaning and removal of residues."

29 CFR 1910.107(g)(2)

Summary: OSHA requires spraying areas to be "kept as free from the accumulation of deposits of combustible residues as practical."

29 CFR 1910.120(j)(1)

Summary: Commonly known as HAZWOPER, requires DOT containers and proper absorbents be kept available and used wherever spills, leaks or ruptures may occur.

29 CFR 1910.1450(e)

Summary: OSHA requires containment and cleanup materials for spills in laboratories to reduce occupational exposure to hazardous chemicals.

### 40 CFR – EPA (Environmental Protection Agency)

EverSoak® Spill Kits (see pages 55-59), Berms & Drain Covers (see pages 67-69) and Spill Pallets (see pages 67; 70-71)

40 CFR 112.7(c)(1)

Summary: Facilities must have "appropriate containment and/or diversionary structures to prevent discharge oil from reaching a navigable water course."

40 CFR 122.26

Summary: Facilities must have a detailed plan in place to prevent illegal discharge of pollutants into waterways.

40 CFR 263.30(a)

Summary: Requires immediate action, such as diking discharge area, by transporter if hazardous waste is accidentally discharged during transportation.

40 CFR 263.31

Summary: A transporter must clean up any hazardous waste discharges that occur during transportation.

40 CFR 264.175

Summary: A hazardous waste container must not sit in its own spill, and it must be able to hold 10% of total volume of liquid or 100% of largest container, whichever is greater.

### 49 CFR – DOT (Department of Transportation)

EverSoak® OverPacks (see pages 69-70) help you comply

49 CFR 173.3(c)(1)

Summary: If a container of hazardous waste is damaged or leaking, it can be placed in a compatible salvage drum that meets UN criteria for shipping by air, highway, rail or water.

49 CFR 173.12(b)

Summary: A lab packing container must be "a UN 1A2 or UN 1B2 metal drum, a UN 1D plywood drum, a UN 1G fiber drum or a UN 1H2 plastic drum tested and marked for the Packing Group III performance level."

49 CFR 173.12(b)(2)(iv)

Summary: When lab packing, "inner packagings... must be surrounded by a chemically compatible absorbent material in sufficient quantity to absorb the total liquid contents."

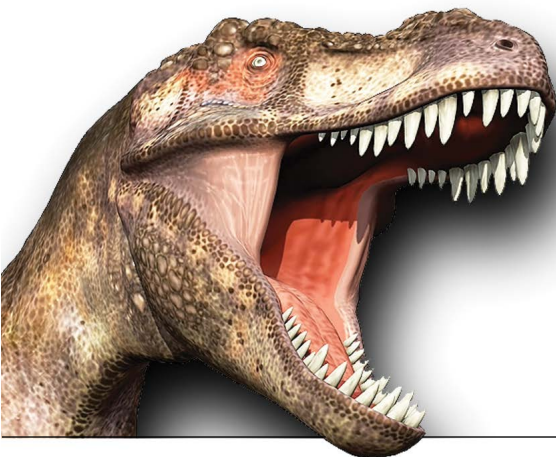

### 33 CFR – USCG (United States Coast Guard)

Polypropylene Sorbent Booms (see page 62) help you comply

33 CFR 154.1047(c)(2)

Summary: Concerning navigation and navigable waters, a facility which handles, stores or transports Group V petroleum oils must identify response plan resources such as containment booms or other methods.

**UNIQUE & EXCLUSIVE WAREHOUSE-FRIENDLY PACKAGING!**

### More Absorption, Real Price Stability and Greater Product Consistency

Sellers General Purpose TOOLBOX® DuraSoak® pads not only provide more absorbency (see charts on individual product pages) than other popular competitive meltblown sorbents, they're made with recycled fibers (see chart) to create greater price stability. And with our recycled fibers being made from our internal excess shop towel material, DuraSoak® provides amazing product consistency.

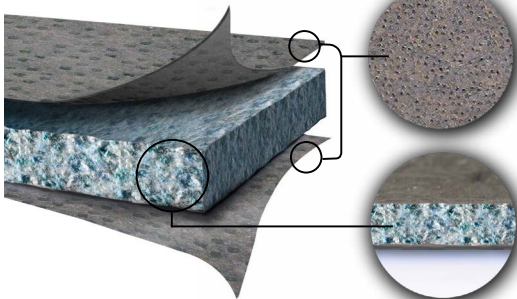

**DuraSoak General Purpose pads and rolls are Class A fire retardant when pad/roll is dry**

U.S. Patent No. 8,118,177.

**Durable meltblown spunbond coverstock**

#### Familiar Reliability

We have added a layer of meltblown polypropylene to our recycled absorbent core to create a sorbent that looks and acts similar to meltblown polypropylene sorbents

#### 4 Different Grades. Each Made With Recycled Fibers.

General Purpose Grade	Amount of Recycled Fiber
Heavy-Duty	65%
Medium-Duty	60%
Light-Duty	65%
Econo-Duty	75%

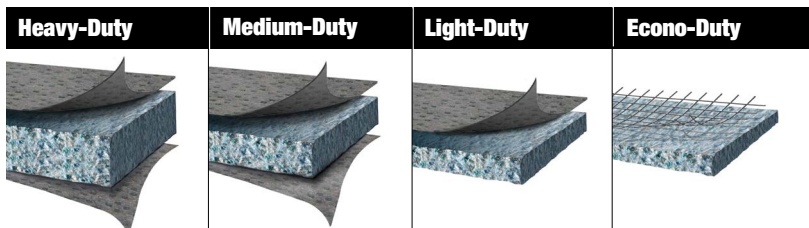

**Absorbent core made with Q-CEL® Technology**

#### More Absorbent

Our absorbent core is thicker and has greater "absorption pockets"

#### Price Stability

Major raw material source comes from internally generated recycled cellulose which creates a more price stable product vs. meltblown polypropylene sorbents

#### 4 Grades of Durasoak®

General Purpose Absorbents	ABSORBENCY	DURABILITY
DuraSoak® General Purpose Heavy-Duty	■■■■■■■	■■■■■■■
DuraSoak® General Purpose Medium-Duty	■■■■■	■■■■■■■
DuraSoak® General Purpose Light-Duty	■■■	■■■■
DuraSoak® General Purpose Econo-Duty	■■■	■■

### How we use our consistent DRC Wiper waste to create consistent recycled sorbents!

Unlike other sorbent manufacturers, we also manufacture shop towels (which are designed to absorb many of the same liquids). This allows us to use the excess material from the production process as a major raw material source which helps create greater consistency and better quality.

Other recycled sorbent manufacturers are forced to purchase waste streams on the open market creating a very inconsistent raw material in both performance and price.

#### What's Inside:

DuraSoak® General Purpose Sorbents start with excess material from our popular shop towels

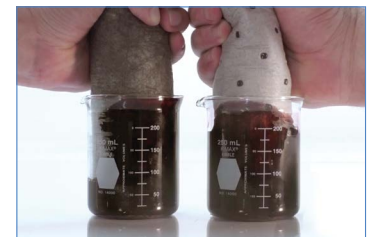

### DuraSoak® Competitive Comparison

#### Compare DuraSoak® General Purpose Absorbent Pads Vs. SPC® Meltblown MRO100 Pads

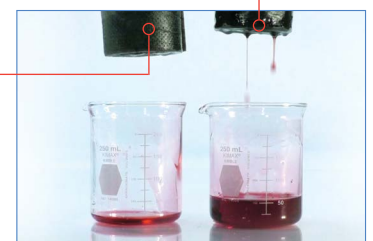

**DuraSoak® General Purpose Heavy Duty Pads** vs. **SPC® Universal Heavy Weight Meltblown Pads (MRO100)**

Both DuraSoak and the competition's pads were immersed in beakers of equal amounts of transmission fluid.

Note the meltblown pad has absorbed less and is dripping.

Note the DuraSoak pad has absorbed much more transmission fluid.

## Oil Only Absorbents

**UNIQUE & EXCLUSIVE WAREHOUSE-FRIENDLY PACKAGING!**

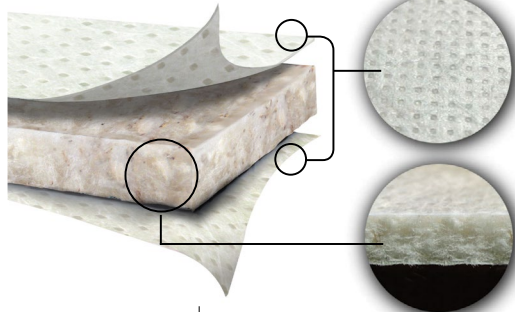

### Finally; Cotton Absorbents that meet or beat market expectations.

Sellars uses cotton, grown in the USA, to produce the Oil Only TOOLBOX® DuraSoak® products. Cotton sorbents actually are excellent oil only sorbents. However, there are significant raw material and manufacturing differences of cotton sorbents in the market today that affects the performance (see article at lower right). Sellars cotton sorbents are a proven performer and were used extensively in the Deep Water Horizon Oil Spill in the Gulf of Mexico in 2010.

**Durable meltblown spunbond coverstock**

#### Familiar Reliability

We have added a layer of meltblown polypropylene to our cotton absorbent core to create a sorbent that looks and acts similar to meltblown polypropylene sorbents

**4 Different Grades. Each Made With Cotton.**

Oil Only Grade	Amount of Cotton
Heavy-Duty	60%
Medium-Duty	50%
Light-Duty	65%
Econo-Duty	85%

**Absorbent core made with Q-CEL® Technology**

#### More Absorbent

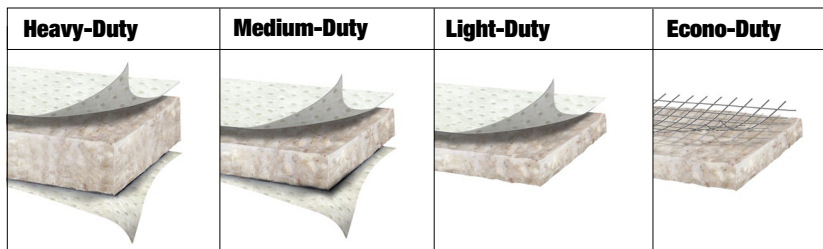

Cotton absorbent core made with Q-CEL® Technology

#### Price Stability

Sellars uses natural cotton which isn't tied to volatile oil prices

We have developed a proprietary manufacturing process to use natural cotton. We actually use a raw material from the by-product of the ginning process. That's why DuraSoak® Oil Only sorbent products are more natural and tend to be more consistent than those of competitors who get their raw material from inconsistent cotton waste streams.

#### 4 Grades of Durasoak®

Oil Only Absorbents	ABSORBENCY	DURABILITY
DuraSoak® Oil Only Heavy-Duty	■■■■■■■	■■■■■■■
DuraSoak® Oil Only Medium-Duty	■■■■■	■■■■■■■
DuraSoak® Oil Only Light-Duty	■■■■■	■■■■■
DuraSoak® Oil Only Econo-Duty	■■■■■■■	■■

### The Sellars Difference: Cotton from the fields, not from textile/industrial waste

DuraSoak® is made with all natural cotton grown in the USA

Cotton from the fields has natural oils that help repel water but absorbs oil based liquids so there are no chemicals that need to be applied to the fibers to make them hydrophobic. However, textile/industrial cotton waste no longer has the natural oils on the fibers and requires a special treatment applied to the fibers to make them hydrophobic.

We have developed a proprietary manufacturing process to use natural cotton. We actually use a raw material from the by-product of the ginning process. That's why DuraSoak® Oil Only sorbent products are more natural and tend to be more consistent than those of competitors who get their raw material from inconsistent cotton waste streams.

### DuraSoak® Competitive Comparison

#### Compare DuraSoak® Oil Only Absorbent Pads vs. SPC® Oil Only Meltblown Pads

DuraSoak® Oil Only Heavy-Duty Pads

SPC® Oil Only Heavy Weight OP100 Meltblown Pads

6" squares cut from both DuraSoak and the competition's pads were immersed in trays with equal amounts of water containing transmission fluid. (Duration 1:40 minutes)

After the pads are removed, you can plainly see that the DuraSoak pad has absorbed much more transmission fluid. The water in the DuraSoak tray is nearly clear while the Meltblown pad's tray still has the prominent reddish hue of transmission fluid.

- EverSoak® Light-Duty Absorbent Split Rolls are perforated every 19" across but not down the center of the length of the rolls

**CAUTION:** Not intended for use with aggressive acids or caustics. Dispose of all sorbent materials in accordance with local, state and federal regulations.

- Each case contains 20 sorbent pillows and 10 drip pans
- For steady, continuous, localized leaks and drips place a sorbent pillow inside of the drip pan to keep liquids from getting to the floor and allowing for easier disposal
- Absorbent Pillows are an economical choice for soaking up leaks and drips around machinery and other MRO (maintenance, repair and operations) applications
- Absorbent Pillows are made with recycled cellulose fibers and are great for absorbing both oil and water, as well as grease, transmission fluid, hydraulic fluid, coolants and many other types of liquids

**CAUTION:** Not for use with aggressive acids or caustics. Dispose of all sorbent materials in accordance with local, state and federal regulations.

**Did You Know?**

**OSHA requires, under 29 CFR 1910.22(a)(2) that, "The floor of every workroom shall be maintained in a clean and, so far as possible, a dry condition." Use Light-Duty EverSoak® Absorbents to help make sure your facility is in compliance.**

## Universal Meltblown Sorbents

**Uses:** Soaks up oil, water and most chemicals

# Meltblown Sorbents

## The most versatile type of sorbent material

Meltblown sorbents are an oil derivative and are manufactured by extruding polypropylene resin. This manufacturing process creates a sorbent product that is durable and will absorb nearly any liquid that is found in most MRO and environmental spills.

## Meltblown: The Making of a classic

### How it's made...

1 **... (resin) is gravity fed into the barrel...**

Raw thermoplastic material in the form of small beads (resin) is gravity fed into the barrel of an extruder.

2 **... material is spun forward by a rotating screw...**

The material is then spun by a rotating extrusion screw which forces the plastic beads forward at the optimum melt temperature into the die.

3 **... strands are forced out with a blast of hot air...**

The resin strands are forced out thru the die to the accompaniment of a constant blast of hot air which enables the formation of microfibrers.

4 **... the loft is adjusted to increase air space...**

The loft is adjusted to increase the air space within the woven fibers for more holding capacity, increased softness, and more cloth-like drape abilities.

5 **... the finished product has a smooth, tight finish...**

The finished product has a smooth, tight finish with good tensile strength.

Industrial rugs keep walkways dry and are durable enough to handle foot traffic and even some forklift traffic.

**Uses:** Help keep your facility in compliance with products that contain and prevent leaks or spills from getting into sensitive areas.

# Spill Containment Products

## OverPacks vs. Salvage Drums

Both OverPacks and Salvage Drums are larger containers into which a smaller one may be placed. However, this is where the similarities end. Salvage Drums are subject to much stricter guidelines (i.e. labeling, pressure tests, capacity limits, marked "Salvage" or "Salvage Drum", etc.) and **ONLY** salvage drums are DOT approved to be used for hazardous materials applications.

### **Did You Know?**

Spill Containment products help meet the following regulations:  
29 CFR – OSHA, 40 CFR – EPA and  
49 CFR – DOT

# LET OUR WAREHOUSE BE YOUR WAREHOUSE.

## 1 CASE MINIMUM

Our massive available inventory allows you to essentially make us your warehouse. Use our unique system to lower your inventory, reduce your warehouse cost and increase your inventory turns. We will also drop ship as little as one case directly to your customers around the country.

We have literally millions of dollars worth of inventory waiting to ship at a moment's notice. We ship directly from our 140,000 sq. ft. distribution and fulfillment center in Milwaukee, WI along with regional warehouses throughout the country.

Our RealTime™ online distribution and fulfillment system for Sellars authorized distributors provides you immediate online control with live inventory, customized pricing and order tracking.

You can even add all of our SKUs onto your website and marketing materials without any inventory investment. We have high res images, logos, sell sheets and even videos available on our online media center.

The only thing you've got to lose is overhead!

## USING OUR WAREHOUSE VS. INTERNAL WAREHOUSING

### Using Sellars as a warehouse

- Convenient one case minimum order
- Same day shipping before noon
- Choose from literally millions of dollars worth of existing inventory
- Order as needed

Place orders using internal systems  
Use RealTime™ online distribution and fulfillment system to view available inventory, custom pricing and track orders.

### Internal warehousing

- Order in any quantity
- Fast shipping
- Maintain stock and anticipate orders
- Tie up precious warehouse space and money to maintain stock

Place orders using internal systems
